New Protocol Driver from FieldServer Technologies for MetOne Particle Counters

Easily interface MetOne Particle Counters from Hach Ultra Analytics to process control networks

March 1, 2008 – FieldServer Technologies, the major gateway manufacturer in the process control industries, introduces the new MetOne Particle Counter driver that enables the HACH Ultra Analytics MetOne Particle Counter to communicate easily with process control networks such as EtherNet/IP, DH+, Modbus TCP, ControlNet and more. This driver greatly enhances the total process control system by inclusion of the data from the particle counter.

The MetOne driver not only enables the transfer of the particle count data but also important control and configuration information of key counter parameters.

About FieldServer Technologies

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. The FieldServer combined with the extensive driver library makes the perfect package to achieve interoperability. For more information about FieldServer Technologies, please visit its Web site at <http://www.fieldserver.com>
